

Application Security & Testing Readiness Quiz

Are You Ready to Unify App Security and Testing?

Review the checklist below. If you answer yes to any of the questions below, you need a unified application security and testing solution that allows you to test your hardened apps.

1. Culture & Team Alignment

- ☐ Your Dev, QA, and Security teams do not collaborate
- ☐ You have no shared goals for security, testing, and release quality
- ☐ There is confusion on roles and responsibilities for a secure development

2. Tools & Workflow Integration

- ☐ You cannot run automated tests on hardened (secure) apps
- ☐ Security tools are lacking integration into CI/CD pipelines
- ☐ Security scans (SAST, DAST, SCA) do not occur at multiple stages of development

3. Automation & Policy Enforcement

- ☐ You are forced to manually run quality tests
- ☐ You lack a clear means to ensure only secured and tested apps are released to production

4. Results & Continuous Improvement

- ☐ You are sending two versions of every app (one protected and one not) to testing
- ☐ You have accidentally sent unprotected apps into the wild
- ☐ Defect rate is trending upward or stable

Ready to unify your application security and testing solutions? [Talk to one of our experts today.](#)

The Digital.ai Difference

One platform that automates release pipelines and integrates complex toolchains.

Unify app delivery, integrate existing tools & scale across any environment.

Automated mobile app testing and security designed to scale.

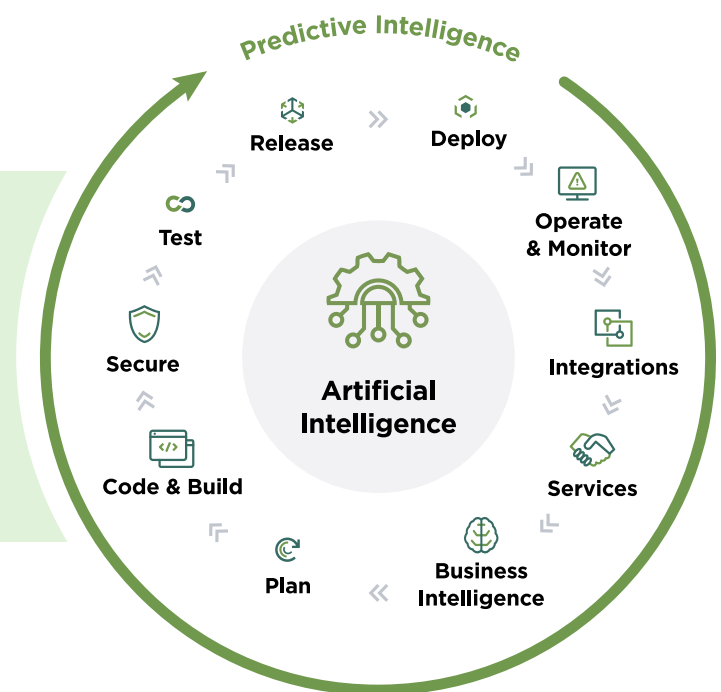

Provide secure, high-quality apps through better automated testing & app protection techniques.

Built-in AI, intelligence, compliance, and governance across all software delivery workflows.

Centralize data, optimize processes, and gain augmented insights for faster, safer software delivery.

Digital.ai AI-powered DevSecOps platform

Helping you harmonize software delivery

About Digital.ai

Digital.ai is the only AI-powered software delivery platform purpose-built for the enterprise, enabling the world's largest organizations to build, test, secure, and deliver high-quality software. By unifying AI-driven insights, automation, and security across the software development lifecycle, Digital.ai empowers enterprises to deliver innovation with confidence. Trusted by global 5,000 enterprises, Digital.ai is redefining how enterprises build better software in an AI-driven world.
